83%

satisfaction rate

Collaborate with our Master 1 students in Management to develop your own projects and employer branding.

Opportunity for your company

- Develop your projects and create value by bringing a fresh perspective to your vision from a younger generation of future managers;
- Face multiple current **environmental, sustainable, ethics and societal challenges** and integrate them in your processes ;
- Enhance your own societal engagement by becoming a privileged partner (**optional**), supporting directly our students (see our Ambassadorship packages).

Which projects

Priority will be given to projects with impact, with a specific focus on **ESG / CSR / DEI criteria**.

The thematic of the projects can be oriented to strategic or operational management :

- Marketing
- HR
- Finance
- Supply chain
- IA & digitalization
- Innovation
- Internationalization
- ...

Which company

- All companies of all sectors (from the start up and the SME to the large-scale organization) are invited to submit their specific managerial questions.
- Public institutions and non profit (social, cultural...) organizations are also more than welcome.

Take part in a **WIN-WIN** enriching collaborative experience!

“We’re certainly going to do it again next year because we think it brings a lot of values both to the students, but also to ourselves and to the customers whom we’ve done these projects”

Alice COUPEZ
Delaware

“The Consulting project course really gives us great skills and helps us to develop those skills to actually work well in our future job”

Kenza
LSM Master 1 student
